2. With regard to the elements of the international application, this report is based on *(replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report)*:

☒ the international application as originally filed/furnished

☐ the description:

pages _____ as originally filed/furnished

pages* _____ received by this Authority on _____

pages* _____ received by this Authority on _____

☐ the claims:

nos. _____ as originally filed/furnished

nos.* _____ as amended (together with any statement) under Article 19

nos.* _____ received by this Authority on _____

nos.* _____ received by this Authority on _____

☐ the drawings:

sheets _____ as originally filed/furnished

sheets* _____ received by this Authority on _____

sheets* _____ received by this Authority on _____

☐ a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.

3. ☐ The amendments have resulted in the cancellation of:

☐ the description, pages _____

☐ the claims, nos. _____

☐ the drawings, sheets/figs _____

☐ the sequence listing (*specify*): _____

☐ any table(s) related to sequence listing (*specify*): _____

4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

☐ the description, pages _____

☐ the claims, nos. _____

☐ the drawings, sheets/figs _____

☐ the sequence listing (*specify*): _____

☐ any table(s) related to sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

Document 1: JP 2001-215228 A (Advanced Life Science
Institute, Inc.), 10 August 2001

Claims 1 to 11

Document 1 cited in the international search report discloses an assay method for the detection of proteins, wherein the proteins within a sample are extracted and solubilized by means of an aqueous solvent that contains an ionic surfactant and then the extracted/solubilized proteins are reacted with antibodies against said proteins while still in the presence of said ionic surfactant.

However, document 1 cited in the international search report does not disclose a configuration wherein the proteins which have been extracted and solubilized by means of an aqueous solvent that comprises an ionic surfactant are used as antigens in order to obtain the antibodies that are used in the abovementioned method.

On the other hand, the invention set forth in the present application can be considered to exhibit an advantageous effect in that it is possible to favorably induce the specific binding of the antigens and the antibodies when the antigen-antibody reactions are

carried out in the presence of an ionic surfactant as a result of employing the configuration in question.

Such being the case, the invention set forth in the present application is novel and involves an inventive step.

Furthermore, document 2 cited in the international search report is the same document as document 1 cited in the description of the present application.
